

# ReColour

Suitable for walls and ceilings

ReColour is a remanufactured paint, available at an affordable cost. It is created from leftover paint which has been treated, filtered and blended into an exciting new range of colours.

## Choosing your paint:

Before you choose your paint colour, it's important to decide what kind of finish you would like. Matt emulsion is a good choice for beginners as it is easy to apply and is good at hiding imperfections in the wall or ceiling. Our Silk emulsion range has a subtle shine to it which is good for reflecting light and is more able to withstand being wiped clean than Matt paint.

Before you start, ensure you have enough paint and that when using multiple tins of a colour, make sure they have the same batch number.

### Disclaimer:

These colours are to be used for guidance purposes. It should be noted that colours printed with ink are not an exact match for paint colours. Whilst we have made every effort to match colours, we cannot guarantee that every batch will be exactly the same.

These paints have been remanufactured under licence from Newlife Paints Ltd.

Community RePaint and the remanufacturing of paint is proudly sponsored by Dulux. There are over 70 schemes across the UK that collect leftover, reusable paint, making it available to individuals, families and community organisations.
